We are suppliers of tool change systems; Quick Mold Change (qmc); Quick The Change (qdc). Complete solutions for tool changes in the single-digit minute range (SMED), worldwide from a single source. Visit our website for more information or send us your request! Faster, more efficient and safer production processes with EAS Change Systems. Time is money. Accelerate and optimize your production with our proven solutions: QMC - Quick Mold Change (injection mold quick coupler) QDC - Quick The Change (Punch Tool Quick Coupler) SMED - Single Minute Exchange of Dies (exchanges within one minute) JIT - Just in time Industry 4.0 - organization of value chains

All from one hand EAS is the author of QMC applications in Europe. Since 1985, EAS has been the innovation leader in all developments related to SMED applications for the plastics industry. EAS was the first company to develop hydraulic clamping

systems for injection molding machines and offered them on the European market. Also behind the introduction of automatic multi-couplings in this market is our company. In addition, we introduced the first applications for magnetic clamping systems in injection molding. We were pioneers in tool changing cars and tool change tables in the European market.
