Welcome to Precise Metal Production – Your specialist for precise metalworking. Since 1986 we have been the reliable and safe partner for precise metalworking such as turning, milling, grinding, gear cutting, laser marking. We are passionate about producing high-precision metal parts and assemblies for our customers that have proven their worth all over the world – our name is an obligation.

Our ambition is your satisfaction. As a specialist for precise metalworking, it is our endeavor to fulfill all requirements placed on us reliably and with the highest quality as well as adherence to delivery dates. This makes us a respected partner for our customers in drive technology, the automotive industry, and mechanical and aggregate engineering.

Repeated certifications according to ISO 9001 as well as the processes according to the standards of ISO/TS 16949 convincingly document our lived attitude towards quality and environment. We manufacture precise turned parts, (turned) milled parts

and ground parts in small and large series with a high degree of innovation and technical know-how – see for yourself! Made in Germany - Made by PMP
