Single-part production of molded rubber parts. Together with our customers, we develop rubber products and, in addition to advice on design, we also offer the selection of suitable rubber quality and manufacturing process - for optimum tool investment and an ideal unit price. Production of technical rubber goods Our production includes ...Production of small series and prototypes; also custom-made possible
Production of special sizes and special materials (eg silicone, Viton, ...)
Production according to drawing or sample (for spare parts)
Repair of damaged or worn rubber products and rubber coatings (on wheels, rollers, carriage wheels, ...)Mold making for the pressing tools is available. Quick quoting, flexible order processing and short delivery times are among our strengths.
