For more than four decades, SEVA-tec GmbH has stood for quality, precision and reliability in industrial drive technology. We offer a wide range of high-quality electric motors, geared motors and frequency inverters – individually tailored to your application. Whether standard solution or tailor-made special order: We configure and deliver the exact drive system that best meets your requirements. The company's core products are geared motors, electric motors, and frequency converters. These are stocked in large quantities so that they can be offered to our customers with the shortest possible delivery times. In addition, the company has a large in-house production facility for customized drive technology. Electric motors (aluminum) Electric motors (cast) Electric motors IP23 Stainless steel engines Single-phase motors DC motors Pole-changing electric motors Brake motors ATEX motors Circular saw motors Flat motors / saw motors Medium-voltage motors Gearboxes / Geared Motors Worm gear motors Worm gears without motors Helical geared motors M series Bevel gear motors K series Parallel shaft gear motors D series Planetary gear motors P series Horizontal - helical gear units H series DC worm gear motors DC helical geared motors DC bevel gear motors DC - parallel shaft geared motors Stainless steel worm gear

The productionWe offer a wide range of combinations and modifications for the  
production of special electric motors/geared motors. These include drives with:  
frequency converter design, special brakes, forced cooling fans, special voltage,  
protection class: IP54, IP55, IP65, IP66, UL/CSA certified, current-insulated ball  
bearings, special paint finish, temperature sensors, bearing temperature  
monitoring, anti-condensation heating, special shafts, second shaft ends, individual  
rotary encoders and much more
