REX is located in Mendrisio right on the crossing of European transport Axes. The refurbished manufacturing plant and offices span over 12,000 m² of which 6,000 are covered. REX manufactures and sells technical items in rubber & thermoplastics while accompanying customers from initial concept to maintenance. The various departments of manufacturing, sales, R&D, and administration employ a staff of over 100 people. The sales network is growing through representatives in various countries.

INNOVATION
Continuous R&D in collaboration with universities in quest to find better mixes and solutions.

CUSTOMER SERVICE
The Direct contact with our customer is at the heart of our production and research

work.QUALITY

ISO 9001, TQM and internal programs for continuous top quality

production.SUSTAINABILITY

Environment, recycling, fair-trade and staff training are all important to us. At the center of Europe Located right at the centre of Europe, REX is able to offer products and service quickly to an increasing number of clients across Europe. Through collaboration with customers from the early stages of a project REX helps its customers find better, more efficient and cost-effective solutions. REX has become over 75 years a powerhouse of experience and know-how. Through continuous research and collaboration with universities REX is able to offer cutting edge solutions. To avoid supply shortages/uncertainties in the supply of raw materials, REX invests in Natural-Rubber plantations. These FAIR-TRADE projects guarantee sustainable income, work and caoutchouc tree growth in developing countries.
