No limits. With our energy.
For over 25 years, MTM Power® is developing and manufacturing power supplies and transformers for industrial, railway and power engineering applications in Germany. MTM Power has its own R&D department, an own EMC laboratory, state-of-the-art technical equipment and highly qualified employees in all departments to continuously maintain the technological leadership and produce innovative solutions. Thus, innovation and creativity in R&D go hand in hand with the precision and quality in manufacturing. The result speaks for itself: MTM Power® produces power supplies for its national and international customers which are exceptionally powerful, stressable and durable. The close network between R&D, production and sales, professional know-how as well as appreciation of customers and suppliers ensure the ability to respond quickly and flexibly to market demands. Products: AC/DC Power Supplies IP67-Modules DIN-Rail-Modules 19" Power Supply DC/DC Converters Transportation Multi-Power Systems Battery Charger Transformers
