SWISS MADE, ENGINEERING KNOWLEDGE AND HERCLESWISS MADE, ENGINEERING EXPERTISE AND COMMITMENT For us, Thalman Maschinenbau AG, the term SWISS MADE is more than just a SEAL OF ORIGIN. A Swiss product is also a PROMISE OF QUALITY - for our CUSTOMERS and for our SELF-IMAGE. Each Thalman machine contains a wealth of EXPERIENCE, sound ENGINEERING KNOWLEDGE, INNOVATION and great COMMITMENT. Since 1960 we have been developing and producing the highest quality LONG FOLDERS which count among the best in the world. To achieve this, many cogs need to interact - similar to the mechanism of a Swiss clock. Each individually assembled part must fulfil its task reliably. This is why we place the utmost importance on INDIVIDUAL QUALITY. Moreover, the true VALUE of a long folder can only be seen when it starts folding: with speed, precision and reliability. Our aim to improve day by day and consistently develop INNOVATIVE STRENGTH, which generates COMPETITIVE ADVANTAGES for our CUSTOMERS, shall remain our MOTIVATION in the future and continue to govern our company's

aspirations.

THALMANN MASCHINENBAU AG - SINCE 1948Thalman Maschinenbau AG dates back to the one-man business founded by OTTO THALMANN in the year 1948 in Frauenfeld. The simple locksmith and metalworking business has developed to become an internationally active engineering company with trend-setting ideas for innovative long folders and efficient solutions for the roofing, facade construction and sheet-metal working sector. The company head office has been based in Frauenfeld since 1960 and it is here where Otto's sons, RUEDI, ROLF AND PETER THALMANN have continued to develop this aspiring enterprise further. Under the present management of Managing Director, MARCO CAPPELLO, the company particularly focuses on the advancement of product development and international orientation. As someone who has previously worked as an entrepreneur in various sectors of the sheet metalworking sector, Marco Cappello also believes in the consistent realisation of the corporate philosophy as a significant and motivating success factor. This includes: The highest DEMANDS ON QUALITY, enthusiastic CUSTOMERS, reliable SUPPLIERS, motivated EMPLOYEES, comprehensive SERVICES, sustainable GROWTH, and with a pronounced INVENTIVE TALENT bring genuine INNOVATIONS onto the market time and time again.
