Rohbimax AG - Top precision and high-performance production
Rohbimax AG brings more than 50 years of experience in precision sawing and is known world-wide for its innovative solutions. We create systems which are custom-made to meet our customers' requirements. The quality solutions are "Made in Switzerland".

Production increases and cost-savings are assured by our flexible, long-lived systems, precision to 0.02 mm and short cycle times. Sawing Machines Precision

Circular Saw: Rka Second Hand Goods Accessories

We are your contact for automated precision circular sawing machines Our models at a glance

If you're searching for high-quality sawing machines with which you can create precise sawing results, then Rohbimax AG in Schwarzenbach is the absolutely right address. Our Swiss quality is appreciated well beyond our borders, in the USA, in China, India, Sweden and many other countries in Europe, including Germany, France, Italy and Austria, where we have many satisfied customers. In addition to our own precision circular saws - our RKA series - we also offer KTC F and NF automated sawing machines. The machines are different in particular in how they are used for various materials and availability. Don't hesitate to schedule a non-binding consultation with us to find which machine can fully meet your requirements. sawsTop support from experts at Rohbimax AG

Rohbimax AG is not only your contact for precision circular saw machines and

accessories for automation. It also supports you in other areas. For example, we

offer sawing tests to show you how fast and precisely our machines work. We can

perform sawing work on your behalf, so that you can fully use your in-house

capacities for on-going projects.
