We are a leading developer and manufacturer of technological products as well as customer-specific plants and machines. Through our innovative automation solutions, our customers produce more efficiently and with optimized value added. Since 1997, numerous industrial customers from Switzerland, Austria and Germany have relied on our many years of competence and experience in product development in special machinery and plant construction. As a general company in the field of mechanical engineering, we take over all engineering services and hand over turnkey plants to our customers. Our motivated team designs, programs and produces clever and convincing solutions for our customers. aerne engineering ag – performance in automation & services

Product development aerne engineering ag transforms ideas into reality. With a strong team that refines, designs, calculates, programs and creates, always with a view to offering our customers a clever solution. And this is possible thanks to the company's many years of experience, meticulous care in development and passion for technology. Engineers, designers and draughtsmen – the team at aerne engineering rely on an immense wealth of knowledge from a range of different

industries. This enables us to offer significant advantages in product development, with the customer benefiting from a single point of contact all the way from the idea to a prototype ready for series production.

Engineering We are all about you!

Whether construction, conception, calculations, programming, documentation or personnel hire, we offer you support in all areas, our goal is your

satisfaction. Automation We offer you: asba feeding systems Robotics Special

engineering Maintenance

Production Series machines Control systems Contract manufacturing

Maintenance Meticulous service and maintenance work forms the basis for the long-term use of a machine or system, thereby ensuring that you, the customer, can

enjoy a consistently high level of productivity. aerne engineering carries out this

work in a reliable and professional manner for you, with a view to ensuring that your

system or machine is fully functioning and ready for use. Thanks to our long-

standing experience in special engineering, product development, engineering and

automation, we are now a leading specialist in the field of maintenance.
