Zuercher Technik is engaged in industrial valves, their automation and application-specific configuration. Its focus is directed on pressure regulators, ball valves, butterfly valves and control valves. Our major customers are to be found in the Chemistry, pharmaceutical and Food Industries.

Growth sectors such as energy suppliers, mechanical engineering and biotechnology are becoming increasingly important and are setting new challenges. Besides our Swiss home market, we also internationally active through our agencies and trading partners.

Assortment- Pressure regulators- Ball valves- Butterfly valves- Globe and control valves- Actuators- Industrial valves- Sterile valves- Rupture disks
Valves and their automation constitute our core competence. Pressure regulators, ball valves and butterfly valves form the focus of our range of products.

Pressure regulators are developed, configured in cooperation with our customers and manufactured by Zuercher Technik. Our business enterprise works in compliance with international standards and is ISO 9001 certified. The credo of our

company is "SWISSNESS" and signifies "reliable, unbureaucratic, prompt and fair".

Quality commitment "Made in Switzerland"

Our pressure regulators are constructed and produced in Switzerland. We are committed to Switzerland as a production location and its competitiveness. The Swiss Made Crossbow represents precision and quality from Swiss production. ZUERCHER TECHNIK - pressure regulators combine knowledge, experience and know-how in the production of pressure regulators. The requirements of the chemical-pharmaceutical industry have led to the development of precise, corrosion-resistant and FDA-compliant pressure regulators.
