The Schlatter Group stands for pioneering technology, trusting partnerships and top performance in welding and weaving technology. As a leading provider of individual and modular system solutions we offer you more than just machines – we offer significant investments in the future. Our products Innovative and powerful machines and systems for track construction, wire and PMC industry. Rail welding systems  
Whether mobile or stationary – our flash butt welding systems and autonomous complete systems ensure precise and reliable connections in track construction.

#### Wire welding systems

Thanks to the modular design of our welding systems, you receive a system that is optimally tailored to your individual requirements.

#### Wire processing lines

Our cold rolling, drawing, stretching and respooling lines set new standards in wire processing and meet the highest demands for safety, reliability and efficiency.

#### Weaving machines

Maximum precision and efficiency with our pioneering weaving machines – perfectly

tailored to the requirements of the PMC industry and the production of technical fabrics and wire mesh.

ApplicationsOur innovative systems for welding technology, weaving technology and wire processing are versatile and can be optimally adapted to your production requirements.Rails and switch productsIndustrial mesh / wire productsPaper machine clothingConcrete reinforcementTechnical fabricsSteel wires

Customer ServiceIncrease productivity and system service life with Schlatter - your reliable partner for first-class customer service.Maximizing the productivity of our customers and extending the service life of their systems is the primary goal of our work. With our comprehensive customer service, we are at your side even after the commissioning of a Schlatter system. In a personal consultation, we will be happy to develop a service package tailored to your individual requirements that will protect your investment in the long term and preserve its value.
