As a qualified and reliable milling machine manufacturer, Bornemann Maschinenbau GmbH near Hanover has been designing and supplying customised product solutions for a wide range of materials and applications since 1986. We are a second-generation family business with a customer base in Germany, Europe and worldwide. Our CNC-Milling machines are suitable for foam and plastics, resins, wood, composites, fibre composites and aluminium.

Products Milling Machines Milling Spindles Spindle Adaptors Tools Chip Disposal  
They are used, for example, in model making as well as, for the production of samples, prototypes and packaging for delicate objects and decorative items. Bornemann also manufactures, among other things, milling spindles, hollow cutters, boring cutters and spindle adaptors that can be effortlessly integrated into your production processes. Whatever materials you want to machine, we only develop, produce and market milling cutters of the highest quality.

If you need a polystyrene milling cutter for your applications, you will also find the right suction machine for chip removal in our product range. Otherwise, we offer you high-performance products that are known for their outstanding results. If you need a portable milling system for flexible finishing, take a look at our model making set. Your advantages at a glance: High quality milling cutters & CNC milling machinesTraditional company delivers quality "Made in Germany"Reliable service to keep your machines running stably  
FURTHER PRECISION TOOLS If you have different rigid foams to process, we recommend the in-house development of our hollow cutters. This hollow cutter produces perfectly smooth surfaces and reduces the milling time by up to 50 %. If you want to drill rigid foams, the suitable solution for you is our boring cutter "TunnelCut". This boring cutter guarantees dimensionally accurate results with extremely easy handling.
