ROWEKO – your partner for innovative plastic solutions and commercial vehicle components “Made in Germany” For over 40 years, ROWEKO has stood for high-quality plastic processing and customized solutions in the commercial vehicle sector. Based in Lauffen am Neckar, we develop and manufacture products such as tube containers, storage boxes, and technical plastic components – all proudly “Made in Germany.” Our customers value us as a reliable partner who delivers tailored solutions with innovation and precision. A dedicated team, a modern machinery fleet, and a clear commitment to quality form the foundation of our success. Whether it's a prototype, small batch, or large-scale production – we support you from the initial idea to series production.

ROWEKO as Your Engineering Partner: We Produce for You! Take advantage of our modern machinery and manufacturing expertise when it comes to technically optimized products, parts, and components made of plastic. From CAD/CAM

programming for toolmaking to our thermoforming systems and post-processing with CNC machines for tool making to our thermoforming equipment and CNC post-processing - we offer everything you would expect from a flexible manufacturing partner.

Thermoforming We are Your Specialist for Custom Thermoformed Plastic Parts
Are you looking for a partner to produce thermoformed parts precisely according to your technical specifications? Then your project is in good hands with ROWEKO. With over 40 years of experience and manufacturing expertise, we realize custom products from prototypes to small series, up to 10,000 units per year. Together with you, we combine the desired functions, properties, and design into a cost-effective, tailored solution. Take advantage of our development know-how and our highly flexible machinery for your technical solution.

Development Expertise Thermoforming Process Manufacturing Expertise Materials Application Examples
Commercial vehicle parts Commercial vehicle parts from Roweko are used wherever the vehicle is used for commercial purposes and must be equipped accordingly. Freight forwarders, special transport companies, construction, trade, assembly and industrial companies are among the sectors that particularly benefit from the advantages of the practical helpers. Sustainability begins here with quality: Since add-on and supplementary parts for commercial vehicles are often subject to high loads in tough everyday use, Roweko attaches great importance to material quality and perfect workmanship.

Hose tube containers Toolboxes Special parts for silo vehicles Load-securing Document boxes Further add-on parts Spare parts Products Small silo Robotic lawnmower garage
Innovative plastic products from ROWEKO - custom solutions for a wide range of applications ROWEKO stands for high-quality plastic products used not only in the commercial vehicle sector but also across various industries. Our product range includes, among others, compact silos for bulk material storage and robotic lawnmower garages to protect your garden equipment. With many years of experience

in plastic processing, we offer custom solutions precisely tailored to your requirements. Discover the diversity of our products and benefit from top-quality manufacturing – proudly "Made in Germany."
