We deliver best performance Powerful reliable light crane systems, crane components and drives are our core competence. As one of the world's leading manufacturers, we have been offering our customers a comprehensive portfolio of solutions for their material flow and logistics needs for more than 200 years - enabling them to achieve the highest levels of efficiency and performance.

Products Cranes and Crane sets Kbk Light Crane System - Modular and versatile/load capacities up to 3,200 kg Kbk Pillar And Wall-mounted Slewing Jibs - Ergonomic workplace solutions Crane Sets for Universal Cranes - Hall cranes and overhead cranes Process Cranes - Tailored solutions for smooth material flow concepts in demanding industries. Components for Process Cranes - Reliable components for maximum process integrity Hoist Units Rope Hoists - High handling rates up to 100 tonnes Chain Hoists - Demag chain hoists - high productivity, efficiency, safety and reliability Drives Geared Motors - The perfect combination of tried and tested components Motors - Reliable drive units Wheel Range - The right wheel for every application Frequency Inverters - For demanding drive applications up to 560 kW Crane end Carriages - Travel units that are ready to be installed Transfer Carriage with Battery Drive - Flexible and autonomous Components Spare Parts - Original is optimal. For service life and

function. Controllers and Wireless Control Systems - Safe and reliable supply of power and data transfer
Power Supply Lines - Safe and reliable supply of power and data transfer
Compact Magnets - Reliable performance: flexible and safe
High-performance, efficient and reliable products
From light crane solutions for small workshops to crane sets for dedicated crane applications for large manufacturers: we supply technology so that our partners can implement the best overhead load handling solutions. Our high-performance crane installations feature efficiency, reliability and maximum safety. They can be configured to meet specific needs: from simple lifting applications to high-tech solutions with assistance and convenience functions – for maximum safety, reliability and support during operation.

Our hoist units have served as reliable components in cranes and materials handling systems for many decades. All over the world. Customers in many industries and in more than 100 countries rely on our technology and expertise in lifting applications. For good reason: we offer a unique range of lifting appliances – from chain hoists to open winch units with load capacities of more than 230 tonnes.

As a leading supplier of industrial drives, we offer the entire range of products – from sub-assemblies to complete systems. These include motors, gearboxes, geared motors and wheel systems. These components can be combined to create complete travel units. Frequency inverters and power supply lines round off our portfolio. All components are designed to match precisely for perfect drive element combinations and sophisticated controls for efficient integrated systems.

Using our components, we have developed a unique range of products for cranes and machinery – always tailored to meet the specific needs of our customers. Every single component reflects our many years of experience: as a proven module for crane installations, machinery and equipment and as a single component.
