We are your specialist for high-quality solenoid valves and accessories for the whole world of industrial applications. With more than 60 years of expertise in the field of valve technology, you will receive comprehensive, individual advice from competent specialists as well as first-class, customised solutions - made in Germany. Our comprehensive range of services includes a complete solenoid valve programme, so that we can provide you with the perfect support for all your needs. We offer customised valve designs based on all common operating principles. Coils in all voltages and with extended voltage tolerances. Prefabricated assemblies. As a long-standing supplier to numerous reputable industrial and railway companies, we are characterised by experience, technically skilled employees and commitment. Not only the variety of our products, but also the large number of system solutions, which of course meet all important international quality requirements, has convinced our constantly growing circle of customers.

OUR SOLENOID VALVES IN THE RAILWAY TECHNOLOGY Large temperature and voltage fluctuations and strong vibrations place special demands on the solenoid

valves used in railway technology. Our products meet these demands as standard and satisfy the most challenging requirements.

They are used in all imaginable areas of a train, especially in refrigeration, air-conditioning and heating systems, water installations, door closing devices, brake systems, wheel flange lubrication as well as in air control on microphones and compressors.

OUR SOLENOID VALVES FOR INDUSTRIAL PLANTSThe world of industrial plants is as diverse as the resulting demands on the valve technology used. This is reflected in our extensive range of service capabilities.

MV valves for industrial plants are characterised by, for example: From the chemical and energy industry, over food, water, refrigeration and medical technology to mechanical engineering and shipbuilding - companies from a wide range of industries worldwide rely on proven, reliable quality from MV automation systems. A constantly growing customer base in new business fields is an expression of the evergrowing trust.
