Your partner for high-quality welding of all kinds A lot has happened since our founding in 2007. Thanks to the trust of our customers, we have consistently had opportunities for growth, and we've taken full advantage of them. What began as a one-man company quickly grew into an established contracting firm in the field of piping and plant construction.

The purchase of our own production facility in early 2017 marked a significant milestone, allowing us to offer welding services directly in-house to both our existing and numerous new customers. By continually investing in state-of-the-art technology, we ensure maximum quality at competitive prices.

Welding We are proficient in nearly all common welding processes and work with almost all weldable metallic materials – always adhering to the highest quality standards. Our regular customers value our professional workmanship, high repeatability, and commitment to clean, technically flawless results. With our modern orbital technology, we are capable of producing butt and fillet welds in a wide range of diameters – regularly tested through visual inspections and technical

examinations at the highest level.

Production of T-pieces and collars

To complement our service portfolio, we manufacture T-pieces and collars tailored to your specific needs – both for in-house use and for existing or new customers.

Whether for one-off or series production, we deliver customized special parts with the highest precision.

Pipeline Prefabrication
Our Commitment: Quality, Precision, and Reliability
We specialize in the prefabrication of pipelines and small vessels – combining craftsmanship with state-of-the-art technology. The result: solutions that set standards in quality and precision.

Your Success Is Our Motivation
Customer satisfaction is our top priority. That's why we value collaborative communication, transparent processes, and flawless results – from the first consultation to final delivery.

Experience That Builds Connections
With many years of experience in the welding trade and a solution-oriented approach, we build sustainable business relationships – characterized by trust, efficiency, and reliability.

Other Services
