advise - plan - extrude? Especially in this day and age it is important that you can rely on your machine capacity. With decades of experience in plastics extrusion and more than 20 years of experience in mechanical engineering, AKMA is a reliable partner for extrusion. We are manufacturer of extrusion lines and followers for the plastics industry. Our systems are manufactured according to your special requirements and wishes in order to solve your extrusion problems economically. Our program includes extruders from Ø 15 mm to Ø 125 mm as well as successions of various kinds. We can also offer you solutions for the processing of difficult materials. We are happy to prove our services to you.
