Fine mechanical competence for more than 130 yearsWe are an experienced producer of fine mechanics and since our founding in 1883 we specialize in high-precision gear cutting of all kinds.From the wooden gear with a diameter of 500 mm to the smallest helical gear with $d = 0.9$ mm and module 0.10, all intermediate steps in all imaginable materials are possible. Starting with wood through all plastics to non-ferrous metals and high-strength special steels.Our customers operate worldwide and are known for their high quality and reliable products. They can be found in all areas of optics, precision mechanics, medical technology and mechanical engineering.We design, manufacture and test in-house from one piece to mass production. Our low-priced standard range of gears and rods of all kinds facilitates the construction of prototypes and series production.
