STAMPING TECHNOLOGY BY EXPERTS

We are your specialist for stamped products made of steel, stainless steel, non ferrous metals, special alloys and materials with special requirements.

Since 1966 we are your reliable partner for the manufacturing of stamped parts made of special alloys, stainless steel, nonferrous metals and steel. We set great importance on quality, sustainability and flexibility. We guarantee short lead times with our stock of prime material (sheets and coils) and finished parts. Small

batches, large batches, prototypes – our team fulfills your desires quick and flexible
Products- Stamping Parts- Washers- Techniques

DIVERSITY AT ITS BEST Are you searching for a competent partner for the production of stamping parts – e.g. washers – according to DIN / ISO standards? Lueg-Stanztechnik is your specialist for special material grades. We handle in our own stamping shop among others stainless steels (also 200HV), steel, nonferrous metals and special alloys. We are particularly specialized in the processing of heat resistant and corrosion resistant steels, stainless steel, aluminium, copper, brass, bronze and titanium. We complete our portfolio with various surface finishes like nickel plating, galvanizing, chromium coating, nitrocarburizing, electro-polishing

and many more. Lueg-Stanztechnik provides your stamping parts with high grade surface finishing to your requirements.

- Stainless Steel 140 HV and 200HV- Duplex Steel / Super Duplex- High-alloyed Stainless Steel- Nickel Alloys – Super Corrosion Resistant Nickel Alloys- Heat Resistant Alloys- Quenched and Tempered Steels / High Temperature Steels- Nonferrous Metals- Steel- Surface Finishing- Hardening / Stainless Steel Hardening

STAMPING PARTS We manufacture stamping parts according to customer drawings, in thicknesses from 0,1mm – 6,0mm, with different outer diameters. If required – our products can be 100% checked by our optical inspection system. Our spectrometer allows us to analyse diverse materials and therefore issue material test certifications, test reports, initial sample reports. **WASHERS** We have in our broad spectrum of products washers with material embossings, round blanks, locking plates, parts with female screw threads, and parts with threads for metal applications. Our portfolio of products also includes mudguard washers, DIN/ ISO washers (also with outer chamfer), parts made of special materials, spring clips, custom shapes and much more. Of course we can manufacture according to customers drawings and customers samples!

ADDITIONAL SERVICES - LASER CUTTING

Modern, efficient, flexible – the manufacture of high quality Laser cut parts

- **BENDING**

An effective bending process guarantees a perfect result. - **TURNING**

We provide precise turned parts made of various materials. Even for your field of industry!
