Our company exists for 40 years already and today has an exhibition space of 6,000 m². We constantly present about 1,200 machine tools and sheet metal machines. By means of sales and purchase our stock changes continuously. Approximately 3,000 second-hand machines which are available in the market, are in our card-file. This enables us to fulfil nearly every request of our customers. After having made an appointment by phone, nearly all machines can be shown under working condition. Please let us know your request, we are prepared to submit detailed offers.
