Our products deliver special moments at the touch of a button. That's why RAFI has been one of the world's leading providers of human-machine communication for more than 100 years. We want to show you what lies behind: Competence, know-how, high level of vertical integration. A completely new perspective on moments that you often do not notice, because the touch is far too fleeting. But it is this barely noticeable resistance, the soft clicking or the flashing that makes each triggering something special. Pay attention to this at the next press - it could be a RAFI moment. **COMPONENTS**

The right tactile stimuli, a flawless appearance and long life. Our complete range of components includes the optimum solution: in addition to push-button and key-operated switches, command and signaling devices, short and long-stroke buttons, signal lights and emergency stop actuators, RAFI also offers you customized components. **SYSTEMS** Unique functionality, tailor-made operating concepts and solution-oriented innovations. That's our claim when it comes to systems. Whether **JOYSCAPE**, **GLASSCAPE** or **FLEXSCAPE** - our high-tech applications are always exactly tailored to your personal project. **EMS** Many years of experience, high process reliability and professional project management. This distinguishes our Electronic Manufacturing Service - across all process steps. We take your wishes

and your worries. The result is products that more than satisfy. AUTOMOTIVE Exceptional development competence, highest precision and concentrated industry understanding. This results in decorative and functional products for the international automotive industry. Functional components, electromechanical systems and assemblies from RAFI meet the highest demands - our own.
