As a Full-Service-Company we offer our customers the complete product range of bearings and rod ends. Our warehouse capacities allow us the direct access to a very large product range. Thanks to our long-lasting connections all over the world we can also offer you a wide and flexible delivery programme. Even if you need special product solutions you can count on the competence of WSW. You will find a competent partner in each of our employees – Service and proximity to customers is one of the most important aspects of our philosophy. Our logistics network and our team, which is perfectly coordinated, take care of your goods leaving the house the same day. Additionally to delivering the goods with our own transporters we also cooperate with different transport partners for a prompt delivery service. Of course, it is also possible to pick up the goods on your own. Quality is the foundation of all activities at WSW. That means that each employee has to contribute to fulfil the customers' expectations, based on the WSW Quality policy: Zero-defect quality for

products, processes and services is a prerequisite for securing the future. Therefore, our first priority is to completely satisfy our customers by means of faultless products and services, deliveries exactly on schedule as well as competent and friendly cooperation between our employees and customers. Products: Spherical plain bearings Rod ends Fixing parts Cylinder Bottom Slide bearings Agricultural parts Special parts Lubrication Gaskets Roller bearings In addition to our own certification according to DIN EN ISO 9001:2008 our suppliers also have to be certified. Furthermore, quality reports are obligatory for each delivery of material as well as regular tests of our products from leading German Universities and Institutes. Our company is certified according to DIN EN 14001:2009. Environmental protection is becoming and more important because of the significant impact civilization has had on the environment. Our service at a glance: stock-keeping and delivery service deliveries exactly on schedule individual packing high quality at reasonable prices strict internal and external quality controls application consulting development and construction constant development of existing products highly motivated employees You cannot compare this service to other companies who want to make a "fast deal".
