MissionWE CREATE PASSION THROUGH OUR SOLUTIONS TO REVEAL THE HIDDEN AND LOCATE THE DYNAMIC
For decades we have supplied our customers with the products and services needed to successfully accomplish their missions. Tomorrow‘s requirements will only grow, so we continually work to maximize performance in the areas that make the difference for users:Smaller – lighter – economic (power, cost, maintenance)Enhanced situational awarenessPerformance under rapidly changing mission scenariosElimination of risks for the userIntuitive design, simple to useField-proven reliabilityEasily integrated into hierarchy systems and solutions

INTEGRATIONULTISENSE – THE OEM SUCCESS FACTOR
We set standards when it comes to sensors of highest quality for orientation and distance measurement.
As the market leader in the fields of observation and location, we offer optronic devices, systems, and sensors for both military and civilian applications. Our reliable products are popular across the globe.We rise to each new challenge, making continuous advancements along the way. Our business activities are clearly focused on our customers’ specific needs as well as the implementation of these in a professional manner. As a result, we create customized products and solutions that are unparalleled the world over.SWISS ROOTS. GLOBAL FOCUS.
As a global partner with roots in Switzerland, we focus on reliable, accurate and flexible premium components, particularly when it comes to integrating optical components and sensors into systems used in the defense and security sector as well as industry in general. This attitude and experience has made us well-known,

even beyond the borders of Switzerland.Laser Range Finding
Magnetic North Finding SERVICESERVICE, QUALITY AND RELATIONSHIP
Our specific service and support capabilities, as well as our ILS portfolio, are fully oriented to your wishes and requirements. This includes detailed testing and examination of defective devices, repairs, the latest
updates and upgrades, and much more. For every one of our products. Because even the best technology is of little use if it is not backed up by equally excellent service. Over the entire product life cycle. This reliability creates confidence, and that often leads to long-term partnerships.
