TESIUM plans, builds, supervises and optimizes process engineering production plants and the associated factory infrastructure. Our engineers support you from the first idea through the complete project planning to commissioning. With practical knowledge, our experts support your company with answers on the topics of safety and environmental law. With many years of experience in the chemical, food and cosmetics industries, high technical expertise and new ideas, we provide economical, sustainable and safe solutions. The service portfolio focuses on the two main business areas Engineering & Automation Safety & Environment. As a high performance specialist for engineering & automation, we offer efficient solutions for the processing industry. We are pleased to bear the responsibility for every part of the life cycle of your process plants. Our engineers attend to and monitor your projects at all times and project phases, from the conceptual consultation and planning, and through the realisation and commissioning, including the entire project management. The second focus of our company is the (further) development and implementation of integrated, sustainable concepts for safety & environment. This includes, for example, high quality consultations as part of your projects, as well as integrated care with regard to safety issues and services relating to operational environmental protection. The safety & environment business area is

complex and varied. Our offer ranges from single topics, for example explosion protection, through the approval management within the project, to complete service provision covering all of the issues relating to safety and the environment. TESIUM GmbH, with its head office in Holzminden/Germany, was founded in 2006 as a 100% subsidiary of Symrise AG, a globally operating supplier of fragrances, flavoring, aroma chemicals, cosmetic base and active substances as well as functional ingredients. This means that TESIUM has high specialist expertise, in particular in the following industries:Speciality and fine chemicals industryFood industryCosmetics industryEnvironmental technologyPlanning of hazardous goods storagesTESIUM is a real professional when it comes to chemistry, smell and taste.
