Fax: +49 (0)36450 38650

In the sixties the foundation stone was laid for today's company in Tannroda in Thuringia. Since then our company has been operating in system and apparatus engineering. Our long-term experience makes us a reliable and established partner for our customers. We exclusively handle high alloy and corrosion resistant steels. Our product range is complemented by the following areas: Container and apparatus engineering, Volume measurement equipment, Industrial washing and cleaning systems, Paper restoration systems, mechanical processing of graphite materials.

The development of our products complies always with the state-of-the-art of technology. We plan and design your systems using 3D CAD systems. The experience of our highly motivated employees combined with our state-of-the-art technical equipment ensures overall quality and precision.

CERTIFICATION Edelstahlbau Tannroda GmbH (EST) is authorized to manufacture pressure equipment. Furthermore, EST uses an integrated management system.
