SEALING TECHNOLOGY SINCE 1878 - Specialist of flat gaskets In addition to PTFE gaskets, metal gaskets, isolation flaps and grooved gaskets, our product range also includes special solutions, such as KlingerSil® and Sigraflex® graphite gaskets as well as many other types of flat gaskets. Since the focus of our company philosophy is on customer orientation, we develop and fabricate solutions for problematic gaskets according to customer requirements exactly and on short notice. These also include flat gaskets made of TopChem that meet the durability standards required in the chemical field and are extremely acid resistant. Our patented Waveline-WLP® refining process also enables us to supply custom graphite gaskets, such as those made of Sigraflex®.

QUALIFIED CONSULTING - For you on site When needed, our field service and sales representatives will provide specialist on-site consultation. Our in-house development department provides solutions for particular challenges

in the area of flat gaskets. In addition to custom solutions for various customers, we also developed the patented Waveline-WLP® sealing system for minimal emissions.

**FAST DELIVERY TIMES** - Our products - fast with you Short delivery times for standard items are facilitated by a comprehensive storage programme for DIN gaskets, sheet material and commercial items. Likewise, our flexible production department is able to produce and deliver individually cut gaskets quickly.

**MODERN TECHNOLOGY** - Forward-looking production technology As a result of CAD-based plotter cutting technology, modern punch presses and comprehensive inventory of tools, in-house flange fabrication and the Waveline-WLP® refining process, we are able to meet demands made by our customers flexibly and quickly. **Low emission:** With the steadily rising demand for low emissions, we consistently expanded our high-grade gasket fabrication and refining processes as our core segment in the future.

#### PRODUCTS

- GASKETS
- SPECIAL GASKETS
- COMPENSATORS
- PACKINGS
- FILTER / SIEVE - PUSH-IN SIEVE
- TECHNICAL PLASTICS
- TECHNICAL FABRICS
- PTFE BELLOWS
- WARTUNGSPRODUKTE

#### SPECIAL GASKETS

- EGRAFLEX STEELFLON
- SIGRAFLEX - WAVELINE-WLP
- CUSTOM GASKETS

#### PRODUCT REQUEST

- ELLIPTICAL SHAPE
- OVAL STADIUM SHAPE
- RING GASKET - SQUARE GASKET
- SQUARE-4-HOLE-FLANGE GASKET
