The company FDB - wire bending and stamping parts was founded in 1995 at Allersberg. We currently have 40 employees. We develop in our own design office, according to your specifications different wire forms and stamping parts.

Services
Wires made of different materials
Bands made of different materials
We cut screw-threads rivet assembly parts
Quality, flexibility and speed are our priorities.

The same high quality of individual parts is maintained, whether produced in small or large quantities.

An effective and flexible method of work enables us to offer you attractive best prices.

Products
Stamp parts
Stamp forming
Wire bending
Prototypes
Erode
Our long experience and expertise is shown in perfectly produced products. We manufacture our metal processing according to your drawings or patterns - and this in almost every form and execution - exactly as you wish.

Filigree stamping parts of the highest quality is our subject
Take a look at a few of our already-made pieces:

Wir fertigen für Sie Handmuster, Prototypen und Kleinserien mit einfachen kostengünstigen Biegewerkzeugen von Hand. Je nach Bedarf und Anforderung

werden die Platinen hierfür durch Drahterosion oder mit Stanzwerkzeugen hergestellt.

For several years we produce for well-known companies goods in a high-quality. The produced pieces were exactly adapted to the needs of customers and made according to requirements.
