We are a company of universal industrial electronics, founded in 1971, and are one of the leading manufacturers in the field of fault reporting technology with alarm annunciator. As an owner-managed company - already in the second generation - we see ourselves as a modern innovation team.
Under the motto "the power to control", we develop and produce multifunctional fault signaling systems and alarm annunciators especially for energy suppliers, as well as for industrial and municipal areas. Furthermore, intelligent cyber-physical systems for condition and facility monitoring for use in Industry 4.0 scenarios, especially for monitoring of operating and utility facilities, with remote alarms and remote maintenance via all common media.
Products- Front panel mounting Fault Indicating Units- Central Fault Indicating Units- Fault indicating systems for DIN rail mounting- Fault reporting systems in 19" card technology- SISSpro, SCADA telecontrol systems- C3 alarm and remote control system- LON-bus display, infrastructure and fault message modules- EtherCat technology- Data logger- SFS/SIMU- LED light panels- Power units and UPS
We are an innovative medium-sized family business which develops, produces and distributes universal industrial electronics with high quality and know-how. As a fair and reliable partner for trade, industry and municipalities in the area of danger detection, automation and control technology, we offer our customers the

necessary modules and systems to ensure safe and reliable operation of their supply and operating facilities in the long term and ecologically.
Employees and management strive to develop and produce future-oriented universal industrial electronics of the highest quality at competitive prices in Germany by establishing and monitoring social and ecological responsibility.
