TecSup GmbH offers you tailor-made solutions in various areas of mechanics and automation. The name TecSup is made up of the two words technology and support and thus symbolizes our mission. In particular, we also continue to provide technical support, the procurement of spare parts and service and maintenance of machines and systems that were produced by the former Maschinenfabrik Bern AG. This also includes many systems which at the time were developed and produced for the company Zeiler AG (later RLC Packaging).

Products
Testing machines for the food industry
Specialised packaging technology
