The provider of individual solutions for sliding bearings and sintered filters. Our extensive skills just summed up. GGT Gleitlager AG begins where standard ends. We are co-thinkers, solution finders, implementation experts and service enthusiasts in one. High quality products as well as top advice and satisfaction are a must. In terms of prices and quality, we are on par with competitors in the market.

However, service wins the game.

FiltersStructural PartsShaft Repair Sleeves Plain bearings are manufactured in different designs and from different materials. Every combination of plain bearing design and material has characteristic properties that make the plain bearing particularly suitable for certain applications.GGT therefore offers a wide range of

plain bearings that can be delivered without pre-ordering. Plain bearings are suitable for rotary, swivel and linear movements. (Cylindrical) bushes can only absorb radial loads, and flange bushes can absorb radial and axial loads in one direction.

Contract Manufacturing CNC turned parts made of Bronze, Brass or Copper
Our core competence lies in the production of precision turned parts made of non-ferrous metals such as bronze, brass or copper. Using our modern machinery we manufacture turned parts of highest quality and according to individual requirements. Framework contracts enable us to produce in shorter delivery time, higher precision and more efficient production costs.

Machining Turned Parts and Bearings made from Bronze or Brass

Machined cast bronze bearings offer technically and economically favorable bearings solutions. It is with high load capability, low weight and good corrosion resistance. We can offer different types of bronze alloys according to the required life time, service etc. The tolerance is much tighter than e.g. wrapped bronze bushes. We put the customer first. The satisfaction of our customers is the logical tip of the pyramid in which our employees in our company view themselves both as customer and supplier. Our quality comes from the fulfilment of all customer expectations throughout the process chain. Our specialist competence is due to the encouragement and development of all those involved in the company and to decades of experience with turned parts made of various materials. Since it was established in 1984 GGT has always been guided by the satisfaction of its customers and the requirements of the market.
