Our goal is to protect your technology and ensure its optimal operation.

 Our product range covers a wide range of applications and is constantly expanding

to meet the growing needs of our customers. From shielding small devices to large industrial installations. One of the most common materials used for our products is a special alloy with material number 2.4545, better known under the brand name MUMETAL® registered by Carpenter Technology (UK) Limited. The nickel-iron alloy is widely known for its high shielding factor and effective shielding effect.Learn more about our products by clicking on the product pages. There you will find detailed information about each item, including their specific applications and underlying technologies. For specific inquiries or if you need assistance in selecting the right product for your needs, our team will be happy to help.
